

The background of the top section features several rolls of yellow and brown adhesive tape and stacks of cardboard boxes. The text 'The right tape for your box' is overlaid in a large, white, sans-serif font.

The right tape for your box

Reliable packaging solutions ensure that products arrive undamaged at their destination. A small but vital component of the overall packaging is the adhesive tape, and choosing the right one is crucial for a securely sealed shipping carton. monta adhesive tapes with natural rubber adhesive are a safe choice for many packaging and transportation scenarios!

monta 124
Extra strong for heavy tasks

- Ideal for packing heavy loads and for long transportation routes
- For challenging carton surfaces, boxes with high recycled content & very high restoring forces
- Printable with brilliant print results
- Low noise unwinding
- Material saving application: One layer of tape is sufficient
- Very robust PVC backing, with low elongation
- Extra strong natural rubber adhesive

monta 283
Your everyday PVC tape

- Ideal for medium heavy to heavy loads and for long transportation routes
- Suitable also for boxes with high recycled content and with high restoring forces
- Printable with brilliant print results
- Low noise unwinding
- Material saving application: One layer of tape is sufficient
- Robust PVC backing with low elongation
- Reliable natural rubber adhesive

monta 315
The office tape - sooo quiet

- Pleasantly quiet and easy to apply, for low noise levels and ergonomic working conditions
- For closing kraft and testliners
- Suitable for light to medium heavy cartons
- Material saving application: One layer of tape is sufficient
- Strong OPP backing
- Reliable natural rubber adhesive

monta 331
The machine tape

- Great for packing frozen goods
- Ideal for automated packaging lines
- Suitable also for cardboard boxes with recycled content
- For light to heavy cartons
- Material saving application: One layer of tape is sufficient
- Strong OPP backing
- Reliable natural rubber adhesive

A photograph of a rubber plantation with rows of young trees stretching into the distance. The trees have thin trunks and green foliage. The text 'Natural rubber adhesive' is overlaid in white on a semi-transparent blue background.

naturally the best

Whether you use recycled cardboard boxes, pack frozen goods or send sea freight off to a long trip with tough climatic conditions, a durable and reliable carton seal can be challenging. A perfect solution for demanding applications are tapes with natural rubber adhesive.

Natural rubber adhesive forms a very strong bond to the cardboard with a very high initial adhesive strength thanks to its unique flowing properties: It penetrates deep into the cardboard surface and encloses its fibres. As only one layer of adhesive tape is required to securely close the box, less material is used. Different carton qualities & shipping requirements are accommodated by varying adhesive formulations.

- For all cardboard types, even with smooth surfaces and high recycled content
- Resistant to humidity and extremely high or low temperatures
- One layer is sufficient, reducing costs, waste, and time in a sustainable way
- A more natural alternative to other types of adhesive technologies

Why monta?

- Customer relations with personal contact
- Fast turnaround

- User-oriented solutions
- Process reliability

- Sales & Marketing Support
- Hands-on training
- Factory tours

- Made in Germany
- Long standing manufacturing expertise

- Modern IT infrastructure
- Standard warehouse line

- Quality control
- Batch testing
- In-house lab
