

The Lindner Suisse core competencies

- Production and distribution of special wood wool articles
- Production and distribution of filling material chips
- Distribution of packaging material and packaging aids

Lindner Suisse offers you

- high-quality Swiss products made of 100% Swiss wood, manufactured according to the Swiss Wood wool Standard
- individual, sustainable and economical solutions
- fair conditions
- experienced staff at your service

Swiss Wood wool Standard

Wood wool is a high-quality, natural material in the form of uniform, fine, and up to 500 mm long, elastic, loose, wood-splinter- and virtually dust-free wood wool threads. It originates from debarked trunks of the highest quality standards with Swiss origin (Label Swiss Wood).

All certificates can be found at lindner.ch/en/certificates.

We will be happy to advise you on the most economical solutions for quality wood wool and packaging materials.

After all: Quality inspires confidence.

The Lindner wood wool range

Lindner Suisse would like to present itself

Lindner Suisse develops and produces pioneering products from Swiss wood wool – with unique, proven production facilities and formulas – in the region of Toggenburg and in legendary Swiss quality. An ecologically sensible, sustainable and resource-conscious production has been part of the Lindner Suisse company philosophy since the beginning in 1920.

History

- 1920 Start of production of Lindner wood wool
- 1953 Start of production of Agroclean® udder hygiene
- 2012 Start of production of Howolis wood wool blankets – the Swiss alternative for erosion-, mulch- and winter protection
- 2012 Start of production of Flamtastic firelighter sticks
- 2014 Innovation in the Howolis range: Vegetation Q-faggots
- 2018 Expansion of the Howolis range: Drenoroll drainage pipe
- 2019 Expansion of the Howolis range: Quickquader faggots for natural hazards | for hydraulic engineering
- 2020 Innovation: Facemask with wood wool filter
- 2021 Innovation: Howolis Drenogrid sealing element

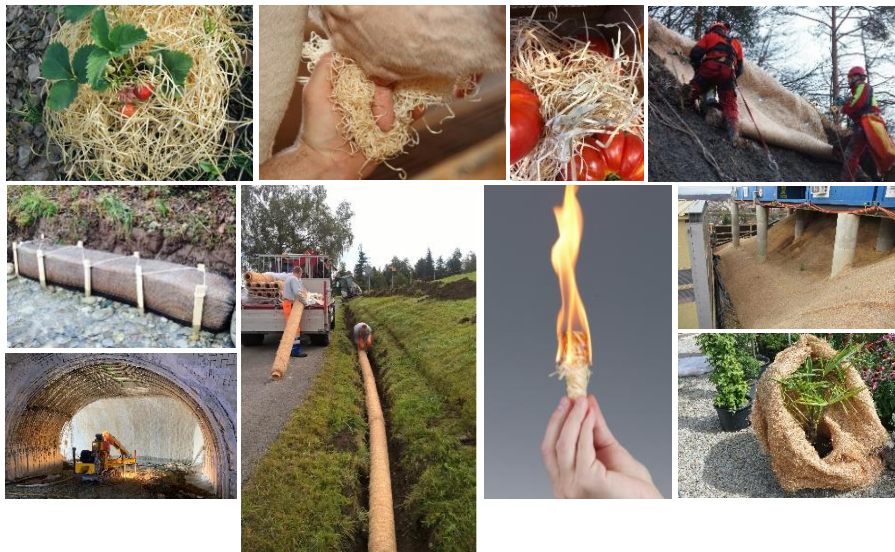

The Lindner Suisse wood wool products

are represented successfully in the areas of packaging, shipping, agriculture, animal hygiene, infrastructure, gardening and landscaping, hydraulic engineering, snowfarming, leisure, decoration, food, wellness and lifestyle.

As a versatile allrounder, wood wool is produced at Lindner Suisse in over 180 different types, for 26 industries, using a production system that is unique in the world.

It is exported to over 20 countries.

Can't find your intended use here? Visit our website www.lindner.ch or contact us for more information without obligation!

We have the right wood wool for (almost) every purpose.

Not all wood wool is created equal.

Only Lindner wood wool is produced according to an individual formula and the Swiss Wood wool Standard, of course without plastic and pesticides. We produce according to strict internal quality requirements at our company location in Toggenburg.

We only use thinning wood from the region cut down in winter with the quality label Label Swiss Wood. This guarantees short transport routes, is resource-friendly and sustainable.
